

SEE BETTER • FEEL BETTER • FUNCTION BETTER

**Wala Under Bed™**

Motion-activated LED strip light that utilizes a smart motion sensor to detect movement and then illuminate the dark room when your foot touches the floor or when you approach the location of the night light. Mounts easily underneath the bed to provide enough lighting to find your way in the dark room while prevent night time disturbing bright light so your partner can continue sleeping. Stays illuminated for a period selected by the user.
